ReadyForAPet: Application specification

1. License
The MIT license is a license for free software, which were considered suitable for the application. It gives the user rights to reuse, modify, copy and spread the software if distributing the MIT license. The MIT license suits this application since we gladly share the work we have done to other developers for further improvements.

2. Images and icon
The images are collected from different sites on internet. The exact source for each picture follows.

Icon
The group from the picture footprint modifies the icon.
